

# ERA QUARANTINE DECISION MAKING MODEL

Eagle Ridge Academy will follow the appropriate path if a student, teacher, or staff member – regardless of vaccination status – is experiencing the following symptoms:

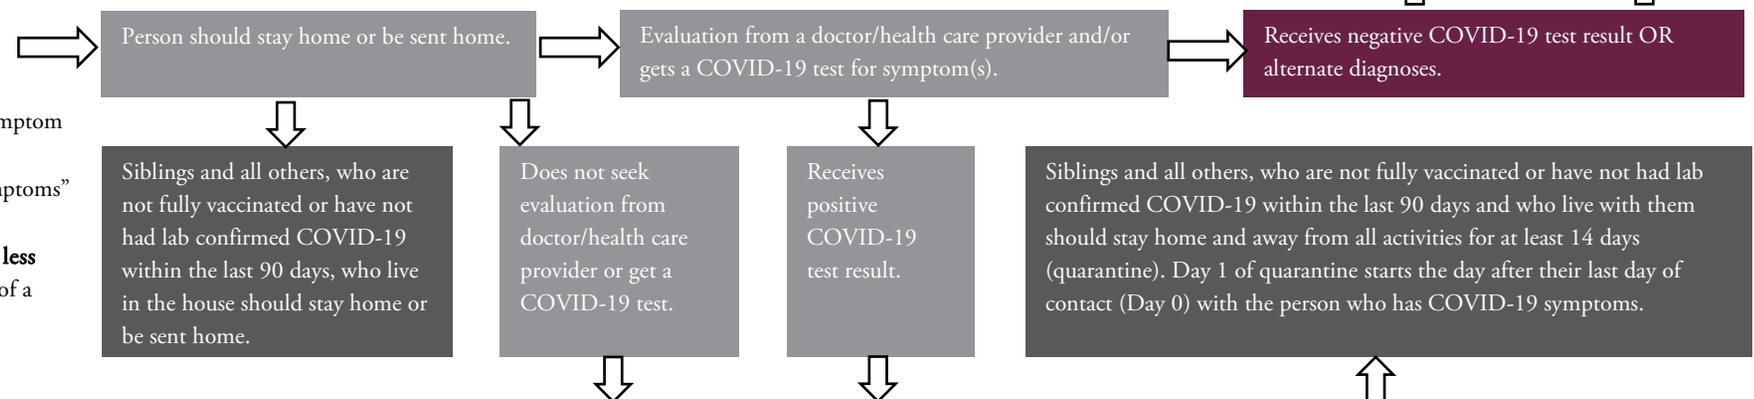

- **More common:** fever of 100.4 degrees Fahrenheit or higher; new cough or a cough that gets worse; difficulty/hard time breathing; new loss of taste or smell.
- **Less common:** sore throat; nausea; vomiting; diarrhea; chills; muscle pain; extreme fatigue /new severe headache; new nasal congestion.

**For people with**  
• ONE “less common” symptom.

**For people with**  
• ONE “more common” symptom OR at least  
• TWO “less common” symptoms” OR  
• ANY symptom (more or less common) during day 8-14 of a shortened quarantine.

If the person tests positive for COVID-19 and has symptoms, they should stay at home and away from others who live in the house (isolation) for at least 10 days from the time the symptoms started and until symptoms have improved and they have no fever for 24 hours without using fever-reducing medications. If they have no symptoms but test positive, they should stay home for 10 days counting from the day they were tested.

**For people who are a close contact of someone who tested positive for COVID-19**

• To identify close contacts, Eagle Ridge Academy will gather and review the infected person’s activity during the time they were infectious at the facility. This review will look back two days prior to the date symptoms started, or two days prior to the date of the positive test if there are no symptoms.
