

# ERA QUARANTINE DECISION MAKING MODEL

Eagle Ridge Academy will follow the appropriate path if a student, teacher, or staff member – regardless of vaccination status – is experiencing the following symptoms:

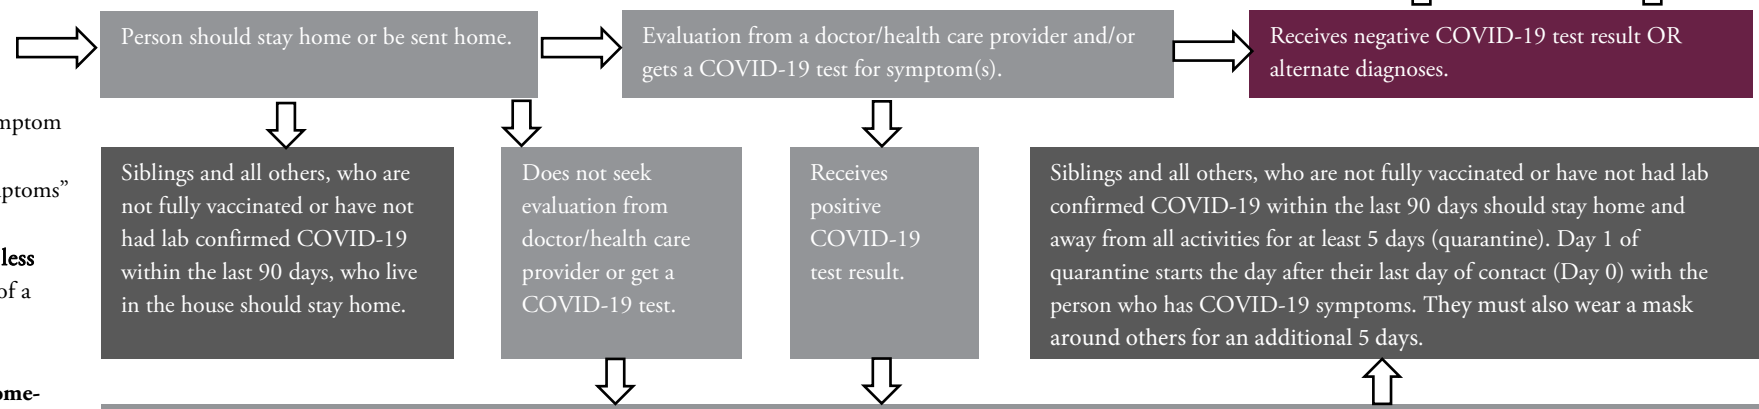

- **More common:** fever of 100.4 degrees Fahrenheit or higher; new cough or a cough that gets worse; difficulty/hard time breathing; new loss of taste or smell.
- **Less common:** sore throat; nausea; vomiting; diarrhea; chills; muscle pain; extreme fatigue /new severe headache; new nasal congestion.

**For people with**  
• ONE “less common” symptom.

**For people with**  
• ONE “more common” symptom OR at least  
• TWO “less common” symptoms” OR  
• ANY symptom (more or less common) during day 8-14 of a shortened quarantine.

Siblings and all others, who are not fully vaccinated or have not had lab confirmed COVID-19 within the last 90 days, who live in the house should stay home.

Does not seek evaluation from doctor/health care provider or get a COVID-19 test.

Receives positive COVID-19 test result.

Siblings and all others, who are not fully vaccinated or have not had lab confirmed COVID-19 within the last 90 days should stay home and away from all activities for at least 5 days (quarantine). Day 1 of quarantine starts the day after their last day of contact (Day 0) with the person who has COVID-19 symptoms. They must also wear a mask around others for an additional 5 days.

If the person tests positive for COVID-19 and has symptoms, they should stay at home and away from others who live in the house (isolation) for at least 5 days from the time the symptoms started and until symptoms have improved and they have no fever for 24 hours without using fever-reducing medications. If they have no symptoms but test positive, they should stay home for 5 days counting from the day they were tested. They must wear a mask for an additional 5 days.

**For people who are a close contact of someone who tested positive for COVID-19**

- Eagle Ridge Academy will not investigate close contacts but will communicate if there has been a positive case in a particular classroom.

A 5-day quarantine is the recommendation for people who have had an in-school exposure to COVID-19. On Day 5 post-exposure, a negative rapid or PCR test result is recommended for the person to return to school on Day 6.
